

The Child Development Center at Masonicare

Open to employees of Masonicare and to the community, we offer a safe, nurturing program that's an extension of family life. Activities are designed to enhance the development of the individual child, to provide security and support to parents, and to bring the joys and laughter of children into the lives of the older residents on our campus through our structured intergenerational programs. Here you will find:

- An environment that is warm and comfortable, aesthetically pleasing, and full of interesting, meaningful, and stimulating materials
- A curriculum focused on whole child development: cognitive, personal/social, physical, and creative expression
- Social experiences that help the child learn how to cooperate, initiate conversation, share toys and make friends
- Physical activity that helps develop fine and gross motor skills
- Values that teach respect for cultural differences and traditions
- 49 children, 6 weeks of age until entrance into Kindergarten
- 4 groups: Infants, Toddlers, Transitional and Preschool
- Hours: Monday-Friday, 6:30 a.m. – 5:30 p.m.
